## Fisheries Certificate Schedule

### Bering Sea Aleutian Islands Pacific Cod Jig Fishery

**Client/Certificate Holders:**

Alaska Fisheries Development Foundation

**Management System:** Pacific cod are managed under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act, MSA), with management recommendations from the North Pacific Fisheries Management Council (NPFMC) and implementation through the National Marine Fisheries Service (NMFS). Under the MSA, the NMFS must manage fisheries to maintain optimum yield (OY) by rebuilding overfished fisheries and preventing overfishing. Alaska manages a small portion of the Pacific cod fishery in state waters.

**Chain of Custody:** Product is generally processed at sea and landed as headed and gutted, frozen fillet blocks and individually frozen fillets; unprocessed fish may be landed at on-shore processing facilities. Chain of custody for at-sea processors starts on board at delivery to the factory. Chain of custody for unprocessed on-shore lands starts upon landing to a processing facility.
