

## Press Release

Marel Inc. & Fusion Marine Technology Inc. are pleased to announce a partnership for exclusive service in the commercial fishing marine industry.

As stated by Einar Einarsson, President of the North American Region “ As the worlds largest and most innovative producer of advanced processing equipment it is imperative to support the equipment in a manner that allows the processor to utilize the full potential of the machinery, and realize the full value of their purchase. Partnering with Fusion Marine Technology provides a unique opportunity to raise the level of service and support for this market segment.”

The basis of the partnership is for Fusion Marine Technology to provide services for Marel’s marine scales and graders onboard vessels in North America. This agreement also includes repair shop activities, service contracts, OEM spare parts from Marel Inc. and product training for newly installed products.

Marel remains focused on transforming the way food is processed, whether it be on land or at sea. This partnership provides a greater level of service and support for our Marine customers while we continue to develop new innovative solutions for future product offerings.
