Seafood Wastewater Bibliography

Compiled by Janet Webster, Oregon State University Libraries, and Ed Kolbe
Oregon Sea Grant with assistance from Larry Schmidt and Ken Hilderbrand

Latest revision: December 2003

Larry Schmidt and Janet Webster assembled this collection. It includes applications of current technology to characterize and treat seafood plant wastewater and research results of some new technology. The period covered is roughly 1970-2001. For more complete citations including abstracts, look at the web version.
